Seeking internship in Data Science · Business Intelligence · Business Analysis · Corporate Finance

EDUCATION

Universidad del Pacífico — Lima, Peru | 2021 – 2026
B.Sc. in Economics | 10th Semester (Final Semester)

WORK EXPERIENCE

Metso Perú — Accounts Payable Trainee | Nov 2024 – Feb 2025

- Automated invoice validation processes (Excel-based), reducing manual errors and processing time by 50%.
- Extracted and analyzed data from SAP to generate financial reports, improving visibility of accounts payable status.
- Managed and tracked invoices end-to-end, resolving discrepancies and ensuring timely payments.

Nissan Perú — Finance Trainee | Dec 2023 – Apr 2024

- Identified incorrect bonus and discount payments (~20% of vehicle base price), preventing significant revenue losses.
- Built an Excel tool to validate dealer payments (bonuses/discounts), cutting validation time from 7+ days to 2 days.
- Conducted profitability analysis, identifying key drivers behind the gap between projected and actual sales.
- Streamlined internal finance processes, improving operational efficiency across the department.

PROJECTS

AI-powered Automated Expense Tracker | May 2026
(<https://github.com/aaccasanih-wq/gastosbot>)

- Built an automation that analyzes bank notification emails using the Gmail API and records expense transactions in Google Sheets using DeepSeek AI for natural language extraction. It also integrates a Telegram bot that supports text or audio messages for manually recording expenses if needed (cash expenses).
- Developed an interactive Streamlit dashboard for real-time spending visualization and analysis, enabling data-driven personal finance decisions across expense categories

AI personal agent | Jun 2026

- Built a modular AI assistant powered by DeepSeek that processes voice and text inputs to manage emails, local files, daily reminders and more. Almost all capabilities are dynamically retrieved via RAG based on user intent.
- Designed a LEGO-like plug-and-play architecture where each tool is a self-contained script. Implements RAG-based memory retrieval of past conversations, with an extensible framework for autonomous tool generation.

SKILLS & TOOLS

Programming	Python (Pandas, NumPy, Matplotlib, Seaborn, Selenium, APIs/Requests, GeoPandas, Folium, Raster, Langchain, etc), SQL, R (RStudio), Excel
Data Science	Web scraping, API, data cleaning & transformation, statistical analysis, data visualization, geospatial analysis (static & dynamic maps), etc
Finance & BI	Financial statement analysis, project valuation, profitability analysis, dashboard & report design
Software	SAP, Bloomberg Terminal, GitHub
Languages	Spanish (native), English (Advanced)
